Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Species I - Figs. 1A, 1B, 2A, & 2B; Species II - Fig. 3; Species III - Fig. 4; Species IV - Fig. 5A; Species V - Fig. 5B; Species VI - Fig. 6A & 6B; Species VII - Figs. 7A & 7B; Species VIII - Figs. 8A-C; Species IX - Fig. 9; and Species X - Fig. 10.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2 and 9-11 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3643

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. During a telephone conversation with Shoko Leek on Tuesday, February 24, 2004 a provisional election was made without traverse to prosecute the invention of Species VI, claims 1-3 and 9-11 and attention was also directed to correspondence filed on 7/28/03 titled "Preliminary Remarks" which explicitly stated that "...the invention as generally described in FIGURES 6A and 6B (Species VI) of the application is pursued...". Affirmation of this election must be made by applicant in replying to this Office action. Claims 4 (Species VII), 5-8 (Species VIII), 12 (Species X), and 13 (Species V) are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Mann 1,742,550.

Mann discloses a support shaft (1); a sheet portion (8); a first line (upper 4, 6 in Figs. 1, 3); a second line (lower 4, 6); the first ends (at 9, 11 in Fig. 5) of the first and second lines being secured to the distal end of the shaft (via connection of 10 with 1 via 14), intermediate portions slidably coupled to the periphery (net mounted to inner bows 4 and also received in openings 5, ie. the net can move slidably relative thereto), the second ends (at 7) of the first and second lines extend in parallel with the shaft (see Fig. 1) and the second ends being capable of being moved in a direction from the distal end to the proximal end (merely defines a direction from right to left in Fig. 1 which the second ends are capable of moving in such a manner to collapse the net).

In regard to claim 2, the second ends would extend through the tube when the net is collapsed (see Fig. 2).

In regard to claim 9, Mann discloses the periphery of the sheet portion defining a channel (aligned apertures of the mesh which form a channel around the periphery and through which portions of 4, 6 extend).

Art Unit: 3643

In regard to claim 11, Mann discloses the line comprising wire (4, 6 made of thin spring steel; the wire is not being particularly claimed).

Allowable Subject Matter

6. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Darren W. Ark whose telephone number is (703) 305-3733. The examiner can normally be reached on M-Th, 8:00am-6:30pm.
